Turps, Be careful not to get on surrounding powdercoated surfaces	Warm water and detergent, rinse well.	Clean off surface rust with JIF and a non scratch pad. Protect with SteelKleen Ezi Wipes

Notes.

- With any cleaner, test on a small non - visible surface first
- When using any polishing or abrasive cleaner, always rub along extrusion profiles - never across
- Some metallics blacken when abrasives are used. Electro Colours are susceptible to this - it is critical to test first!
- Please don't use any other products other than those listed - consult if you have any questions
- If you can use Cem-Gon, please ensure you scrub with a soft brush and rinse thoroughly afterwards
- Always use non-scratching cloths
